## CYCLAMEN PERSICUM.

Too much can scarcely be said in favour of the superb varieties of this plant, of which the old *C. persicum* is the type, whether they are regarded as objects for the ornamentation of the greenhouse or conservatory, or for table decoration, for which their compact floriferous character eminently fits them. The flowers are also extremely useful for bouquets, and when plucked, if kept in water, they will last in freshness and beauty some weeks.

ASTILBE BARBATA.

GENERALLY, BUT ERRONEOUSLY, KNOWN AS

## HOTEIA JAPONICA, AND SPIRÆA BARBATA.

Cannot be too highly appreciated as a decorative plant for early forcing, its pretty erect shining green foliage, surmounted by numerous beautiful and graceful panicles of white inflorescence, giving the whole plant an elegant appearance, and rendering it at once most pleasing and useful for decorative purposes.

*Strong imported clumps, 9s. and 12s. per dozen.*

## SPIRÆA PALMATA.

One of the most beautiful hardy plants in cultivation, with deep purple red stems and branches, and crimson-purple broad corymbs of flowers. It is a native of Japan, and was discovered and introduced by Mr. Fortune. 12s. per dozen.

**DIELYTRA** **SPECTABILIS.**

Strong clumps of this graceful and well known plant for early forcing.

*Price, 6s. and 9s. per dozen.*

IRIS.

ENGLISH (I. anglica or Xiphioides).

For brilliancy of colour and fine vigorous foliage the English Iris takes rank amongst the handsomest of flowering bulbs. They greatly resemble the Spanish Iris in stylo of growth, attaining a height of about 2 feet, and produce, during June and July, a succession of largo and beautiful flowers.

## AMARYLLIS.

This deservedly popular family cannot be too highly recommended. The ease with which they are cultivated and the gorgeously beautiful flowers they produce at almost any season, make them most desirable in any collection. By gradually drying the bulbs they can be put to rest at any time during the year, and then when required, if started in a gentle heat they quickly develop their large Lily-like blossoms, which are of various colours, generally embracing crimson, white and red, scarlet, rose-flaked, striped white and crimson, with various shades of colours.

## AMARYLLIS BELLADONNA (The Belladonna Lily).

This beautiful hardy bulb is imported early in September; their large handsome blush flowers richly flushed with rosy purple, render them extremely useful for greenhouse and conservatory decoration. 6s., 9s. and 12s. per dozen; 40s., 60s. and 80s. per 100.

## BEGONIAS.

### HANDSOME-FLOWERED, TUBEROUS-ROOTED SECTION.

*Those marked (\*) are double-flowered varieties.*

The following novel and beautiful varieties will be found admirably adapted for the summer and autumn decoration of the Greenhouse and Conservatory; for they produce in the utmost profusion magnificent flowers of very large size, and great variety in colour. They do not require stove cultivation, but will succeed well in a greenhouse. The tubers rest during the winter months, similar to Gloxinias, and can be easily re-started into growth in the spring.

These can be sent in boxes by post.

Selections of good varieties of Handsome-flowered Begonias can be made by  
 Mr. W. B. at 18s., 30s. and 42s. per dozen.

## EUCODONIAS.

These exceedingly pretty hybrid Gesneraceous plants have nicely tinted ornamental foliage and extremely beautiful flowers, which are freely produced on small plants. The flowers are nearly the size and form of a drooping Gloxinia, but have the soft colouring and elegant markings of some of the attractive Tydas. 1s. and 1s. 6d. each, according to sorts.

## GESNERAS NÆGELIAS).

The value of Gesneras as decorative plants can scarcely be over-estimated. Most of them have rich velvet-like foliage, which, in the respective kinds, varies from green to crimson. If only grown for the foliage they are very attractive, but they produce splendid pyramidal spikes of blossom, which are extremely handsome. Originally, however, the principal colour was orange-scarlet; now, as the result of fertilisation, there are various colours and shades, added to which the spotting on the flowers of some of the varieties is extremely pretty. Selections of good varieties at 30s. and 42s. per dozen.

LAVATERA ARBOREA VARIEGATA.

Price, 2s. 6d. per packet of 30 seeds; plants, 3s. 6d. each; per dozen, 30s.

The *Journal of Horticulture*, in noticing this decorative border plant, which received a First Class Certificate from the Royal Horticultural Society, in May 1882, thus writes of it:—"Very rarely indeed does it fall to our lot to figure for the first time and introduce to our readers a border plant so striking in appearance as the Variegated Tree Mallow. When Mr. Smith first sent us leaves of his new acquisition, we were almost startled by their markings; the irregular mixture of very dark green, pale greenish grey, and pure white, impart to the plant a remarkable appearance."

Mr. Smith, from whom Mr. W. B. purchased the entire stock, wrote respecting it:—"I have proved that it comes true from seed, but it must be understood that it is something like the Variegated Maize, does not show much variegation in a young state. The plants from seed sown last spring are now beautifully variegated. There is not the least doubt but that it will be one of the finest and most effective plants for large beds and borders that has ever been introduced. Last winter it stood out without injury; it is best, however, to pot some up, and keep them in a cool house, and turn them out in spring, but a slight protection outside would be sufficient to keep the plants undisturbed in beds or borders, which is desirable, for in spring of the second year the beauty of such plants is beyond description."

# SEED FROM PRIZE STRAINS.

PRIMULA

SINENSIS.

**PRIMULA SINENSIS FIMBRIATA MONT BLANC.**—Unrivalled in the pureness of its snowy white, densely fringed flowers, which are of great size and substance. 5s. per packet.

**PRIMULA SINENSIS FIMBRIATA SPLENDIDA.**—The flowers of this magnificent strain are a deep crimson, beautifully fringed, and of immense size and substance. 5s. per packet.

Mr. W. BULL has great confidence in offering the above unrivalled strains of Chinese Primulas. They are unsurpassed in the great breadth and substance of their beautifully fringed flowers, which are borne in immense heads, growing well above the foliage. They are of fine habit, and can be highly recommended.

**PRIMULA SINENSIS FIMBRIATA ALBA**  
**PRIMULA SINENSIS FIMBRIATA RUBRA**  
**PRIMULA SINENSIS FIMBRIATA FILICIFOLIA ALBA**  
**PRIMULA SINENSIS FIMBRIATA FILICIFOLIA RUBRA** } Extra choice.

These varieties possess most elegantly fringed edges, and are offered with the greatest confidence. 1s. 6d. and 2s. 6d. per packet.

**PRIMULA SINENSIS FIMBRIATA "Bull's Premier Mixture."** 1s. 6d. and 2s. 6d. per packet.

Seed of Mr. WILLIAM BULL's select strain of this useful and favourite plant is now offered in mixture containing all the new and most distinct colours and varieties; the many unsolicited testimonials received point conclusively to the fact of its being appreciated among growers as of unusual excellence. To distinguish this from the ordinary mixture of *P. alba* and *rubra* generally supplied, Mr. W. B. designates this choice mixture as above.

**PRIMULA SINENSIS FIMBRIATA KERMESINA SPLENDENS.**—A fine variety, with rich crimson-coloured flowers. 1s. 6d. and 2s. 6d. per packet.

**PRIMULA SINENSIS FIMBRIATA "VILLAGE MAID."** White striped with rosy carmine; splendid variety. 1s. 6d. and 2s. 6d. per packet.

**PRIMULA SINENSIS FIMBRIATA ALBA FL. PL.**

**PRIMULA SINENSIS FIMBRIATA ROSEA FL. PL.**

**PRIMULA SINENSIS FIMB. KERMESINA SPLENDENS FL. PL.**

These double Primulas are a valuable acquisition, especially to cut from, as they do not drop their flowers like the single varieties. 3s. 6d. and 5s. per packet.
